University of Minnesota

### Work Experience

Frontend Web Developer II 2022 - 2024

fjorge

- Led and managed projects focused on creating custom WordPress websites that combine seamless user experiences with visually captivating designs.
- Transformed design mockups into responsive HTML, CSS, and JavaScript code, ensuring optimal performance across various devices and screen sizes.
- Collaborated closely with cross-functional teams, including designers and backend developers, to ensure cohesive project execution and successful project delivery.
- Acted as the primary point of contact for clients, defining project scopes, objectives, and requirements, and maintaining clear communication throughout the project lifecycle.

UX Frontend Engineer

Trinity Insight 2021 - 2022

- Developed large scale eCommerce site builds on Wordpress, Shopify, and BigCommerce focusing on performance, accessibility, and maintainability.
- Added custom Google Analytics events to track interactions on client's sites. Including, but not limited to, scroll depth event, add to cart events, and click events.
- Implemented A/B tests with UX best practices and client feedback.

Freelance Developer

2019 - Present

- Created WordPress sites from scratch utilizing Beaver Builder, Gutenberg Blocks, ACF, and custom PHP templates.
- Managed website hosting, database services, and performed site maintenance .
